

WE'RE ROLLING OUT OUR INNOVATIONS TO YOU

WE'RE ROLLING...

From mid-March 2022 onwards, our Heating & Refrigeration Technologies truck is doing a road trip through Europe. Our truck is a showcase on wheels of who we are and what we do.

We bring our innovations to our customers, advisors, universities so they don't have to drive to us.

[GEA.com](https://www.gea.com)

HOW DOES IT WORK?

Once the truck is at its destination, it 'folds out' to a 70 m² event location where we welcome our guests in our world of innovations.

WHAT
CAN YOU
EXPECT
ONCE YOU
ENTER?

GEA.com

We welcome you in the universe of GEA Heating and Refrigeration. We've packed the truck with some of our latest innovative products.

Of course, you'll get the chance to meet our experts, to exchange ideas and to connect.

Innovative heating & cooling products

Like our brand new GEA Grasso V XHP reciprocating compressor, the heart of our RedGenium, and the GEA CompaX: the X factor in our GEA BluX, the GEA Omni Control and many, many more.

Innovative heating & cooling solutions

You get to know all about our Sustainable Engineering Solutions and about how you can use Heat to Cool down our warming planet.
